11. Logging Out

1. Introduction

Lola Fe's Laundry Shop Management System is a web-based point-of-sale and operations management platform designed specifically for laundry shop businesses. It allows shop owners and workers/staff to manage customer orders, track order statuses, manage services and pricing, view business reports, and configure shop settings from any device with a web browser.

2. User Roles

The system has two types of users: Admin and Worker. Both users log in using the same login page and have access to the same core features; Dashboard, New Laundry, Orders, Customers, and Reports. The differences between the two roles are as follows:

Admin: Has full access to the system, including:

- The Settings section, where system configurations such as receipt settings, printer setup, payment methods, operating hours, overhead expenses, security, and database maintenance can be managed.
- The ability to view, add, edit, and disable/enable services on the Services page.

Worker: Has access to all operational features (Dashboard, New Laundry, Orders, Customers, Reports) but has the following restrictions:

- Cannot access or modify the Settings section. This ensures that workers can handle day-to-day transactions without altering system configurations.
- Cannot access or edit the Services page. Workers/Staff can view available services when creating orders, but cannot add, edit, enable, or disable services.

3. Logging In

Accessing the system requires two layers of authentication: a Store Login Portal PIN and a user account login.

3.1. Store Login Portal (PIN Verification)

When you first open the system URL in a browser, you will be greeted by a Security Verification screen. This screen acts as a store-level lock to prevent unauthorized access to the login page.

Steps:

1. Open the system URL: <https://lolafes-laundry-app.vercel.app/login>
2. A PIN pad will appear on the screen with the label "Security Verification" and the instruction "Please enter PIN to authorize Store Login Portal".
3. Enter the correct 6-digit PIN using the on-screen number pad.
4. Once the correct PIN is entered, the system will automatically proceed to the user account login page.

3.2. User Account Login

After the PIN verification, you will be brought to the main login page for Lola Fe's Laundry Shop.

**Welcome to Lola Fe's
Laundry Shop**

Log in to continue

Email

@ Enter your Email

Password

Enter your password 

[Forgot Password?](#)

Log in

By logging in or creating an account, you agree to our
[Terms of Service and Privacy Policy](#)

Don't have an account? [Sign up](#)

Steps:

1. Enter your registered Email address in the Email field.
2. Enter your Password in the Password field. You may click the eye icon on the right side of the password field to show or hide the password text.
3. Click the Log In button.
4. If your credentials are correct, you will be taken to the Dashboard.

Additional options on the login page:

- **Forgot Password:** If you have forgotten your password, click the “Forgot Password?” link. This will initiate the password recovery process.
- **Sign Up:** If you do not yet have an account, click “Sign up” to create one. Note that account creation may be subject to admin approval.

3.3 Forgot Password

This modal facilitates the Secure Password Reset process. Its purpose is to allow administrators to request an automated recovery link if they have lost or forgotten their credentials. To maintain high system security, the process is restricted strictly to verified email addresses already stored in the database.

- Step 1: Identify your Account: In the Admin Email Address field, type the full registered email address associated with your administrator account.
- Step 2: Request the Link: Click the Send Reset Link button. The system will then attempt to locate your profile and dispatch a recovery email.
- Step 3: Check your Inbox: Open your email provider to find the reset instructions. If you do not see the email, check your "Spam" or "Junk" folder.

The modal explicitly states that "Only fully registered admin accounts will receive a password reset link via email." If a staff member or unauthorized user enters an email that is not in the system, no link will be sent for security reasons.

4. Dashboard

4.1. Dashboard Overview

Once logged in, you will land on the Dashboard. The Dashboard is the main home screen of the system and gives a real-time summary of the shop's current operational status. The top of the Dashboard shows a greeting message with the current day and time.

The Dashboard displays four key summary cards at the top:

- Today's Sales: Shows the total sales earned today. Displayed in Philippine Peso (₱).
- Pending: Shows the number of orders that are currently pending and need attention.
- In Progress: Shows the number of orders currently being washed or processed.
- Ready: Shows the number of orders that are ready for pickup or delivery and need to be notified to the customer.

4.2. Action Messages

Below the greeting at the top of the Dashboard, you may see an Action Message banner. This banner shows real-time notifications about important order events. For example, it may say "Ayan Torreda's order is stuck in 'pending'" with the corresponding order ID. These messages help the user quickly identify any order that needs immediate attention.

4.3. Today's Laundry/ Order (Order List Overview)

This section on the Dashboard shows a list of all current orders for the day.

If you click any order in Today's Laundry/ Order, you will see:

- Customer Name: The person who placed the order.
- Order Number: A unique ID for tracking (e.g., #ORD-XYT467).
- Handover: How the order will be handled (e.g., Pickup, Delivery).

- **Update Status:** The current status of the order (e.g., Processing, Ready, Completed, Picked Up or Delivered).
- **Total Price:** The total cost of the order.

4.4. Unclaimed Laundry/ Orders (Overdue Orders)

The lower section of the Dashboard contains the Unclaimed Laundry/ Order list. This section lists all orders that are past their expected completion or pickup/delivery date.

The screenshot shows a dashboard section titled "Unclaimed Laundry" with a notification icon and a count of 3. Below the title, there are three order cards, each with a red border indicating they are overdue.

Customer Name	Order ID	Handover Method	Overdue Time	Total Amount
Meneses Gerard Florence	#ORD-BVT501	DELIVERY	1d 2h Overdue	₱470.00
Ayan Torreda	#ORD-KKZ655	PICKUP	2d 20h Overdue	₱0.00
Ayan Torreda	#ORD-MWU659	PICKUP	3d 21h Overdue	₱65.25

Each unclaimed order card shows:

- Customer name
- Order ID
- Handover method (Delivery or Pickup)
- How many days overdue the order is (shown in red)
- Total amount of the order

Clicking on an unclaimed laundry entry will open a detail modal. From this modal, you can use the “Slide to Claim” button to mark the order as claimed/picked up by the customer.

4.5. Quick Actions

At the top right of the Dashboard, there are two quick action icons:

- Plus icon (+): Creates a new order directly. Hovering over it shows a “Create New Order” tooltip.
- Person icon: Opens the Customers Directory. Hovering over it shows a “View Customers Directory” tooltip.

5. New Laundry/Order

The New Laundry page allows you to create a new laundry order for a customer. You can access it by clicking “+ New Laundry/Order” in the left navigation menu or the plus icon on the Dashboard.

5.1. Selecting a Customer

The New Laundry form has a Customer section on the left side. There are two ways to assign a customer to an order:

- Click the “Select Existing” button. A dropdown list will appear showing all registered customers. Each customer entry shows their name and phone number. Click on the customer’s name to select them. Their details (Name, Contact Number, Address) will automatically populate in the form. The order summary panel on the right will also update with the selected customer’s details.

The screenshot shows the 'Customer' section of the New Laundry form. At the top left is a person icon and the title 'Customer'. At the top right is a 'Walk-In' toggle switch. Below the title are two buttons: 'Select Existing' (with a magnifying glass icon) and 'Add New' (with a person icon). Below these buttons is a search bar with the placeholder text 'Search by name or phone...'. Below the search bar is a list of two customer entries. The first entry is 'Ayan Torreda' with phone number '09467535007'. The second entry is 'Meneses Gerard Florence' with phone number '09565372661'.

- Click the “Add New” button to manually enter a new customer’s information (see Section 5.2).

The screenshot shows the 'Customer' section of the New Laundry form with the 'Add New' button selected. Below the 'Select Existing' and 'Add New' buttons are two input fields: 'Customer Name *' and 'Contact Number *'. The 'Customer Name *' field has the placeholder text 'Enter Customer Name'. The 'Contact Number *' field has the placeholder text '09XX XXX XXXX'. Below these two fields is a single input field for 'Address' with the placeholder text 'Customer Address'.

When an existing customer is selected, the system will also check if they have any available rewards. If the customer has earned enough points for a free service (based on the loyalty program), a yellow banner will appear that says “You can claim a free service!” along with an “Apply Reward” button.

5.2. Adding a New Customer

If the customer is not yet registered in the system, click “Add New” to enter their information manually. You will need to provide:

- Customer Name (required)
- Contact Number (required)
- Address (optional)

The image shows a form titled "Customer" with a person icon. At the top right is a "Walk-In" toggle switch. Below the title are two buttons: "Select Existing" with a magnifying glass icon and "Add New" with a person icon. The form has three input fields: "Customer Name *" with placeholder text "Enter Customer Name", "Contact Number *" with placeholder text "09XX XXX XXXX", and "Address" with placeholder text "Customer Address".

The new customer will be saved to the system and added to the customer list for future orders.

5.3. Walk-In Orders

For customers who are not registered and you prefer not to add them to the database, you can use the Walk-In toggle. This is a toggle switch at the top right of the Customer section labeled “Walk-In”.

 **Customer**

 Walk-In ☒

Select Existing

Add New

Customer Name *

Enter Customer Name

Address

Customer Address

When the Walk-In toggle is switched ON:

- The “Select Existing” and “Add New” buttons disappear.
- The customer name field becomes a simple text input. The customer’s name is still required to be entered even for walk-in orders.
- Walk-in orders are not linked to a customer profile and will not accumulate loyalty points.

5.4. Adding Services

The Services section in the middle of the form lists all active services configured in the system. Each service shows:

- Service name and type category (e.g., WASH ONLY, DRY ONLY, WASH & DRY)
- Price
- A quantity selector (minus and plus buttons)

 **Services**

WASH ONLY

Wash 8kg
₱65.25

– 0 +

new service
₱70.00

– 0 +

Click the plus (+) button next to a service to add it to the order. The quantity can be increased by clicking (+) again or decreased with the minus (-) button. Selected services will appear in the Order

Summary panel on the right side. If the selected customer has a reward available, a “Provide customer Info first” prompt will guide you to select the customer before applying a reward.

5.5. Handover Method

In the Order Summary panel, select how the finished laundry will be returned to the customer:

- Pick Up: The customer will come to the shop to collect their laundry.
- Delivery: The shop will deliver the laundry to the customer’s address.

5.6. Delivery Fee

If “Delivery” is selected as the Handover Method, an additional Delivery Fee field will appear. Enter the delivery charge in this field. It will be added to the total amount.

5.7. Payment Status

The Payment Status toggle determines whether the customer has already paid:

- Paid in Full (toggle ON): The customer has paid the full amount.
- Unpaid (toggle OFF): The customer has not yet paid.

5.8. Payment Method

Select the payment method used by the customer from the dropdown (e.g., GCash, Cash, Maya). Only payment methods that have been enabled in Settings will appear here.

5.9. Amount Received and Change

Enter the amount of cash or payment received from the customer in the “Amount Received” field. The system will automatically calculate and display the Change Due. Quick-fill buttons (e.g., Exact, ₱100, ₱500, ₱1000) are available to quickly populate common amounts.

The interface shows a light green rounded rectangle. At the top left, it says "Amount Received" in green. At the top right, it says "Change: ₱100.00" in green. Below "Amount Received" is a white input field containing "₱ 100". Below the input field are four buttons: "Exact", "₱100" (which is highlighted with a green border), "₱500", and "₱1000".

5.10. Placing the Order

Once all required information is filled in (customer, at least one service, payment details), click the “Place Order” button at the bottom of the Order Summary panel to place the order. The order will appear in the Orders list and on the Dashboard.

6. Orders

6.1. Viewing All Orders

Click “Orders” in the left navigation menu to access the Orders page. The page is titled “All Orders Manage and track orders”.

The screenshot shows the "All Orders" page header. It includes the title "All Orders" with a notification badge "1", the subtitle "Manage and track orders", and a "+" icon. Below the header is a search bar with the placeholder "Search name, phone, address, or order #...". To the right of the search bar are two dropdown menus: "All Orders" and "Today". Below the search bar is a list of order entries. The first entry shows a circular refresh icon, the customer name "Ayan Torreda", the date and time "APR 19 09:27 AM", a "PICKUP" badge, the order ID "#ORD-KZZ852", a "PROCESSING" badge, the payment status "UNPAID", the amount "₱65.25", and "Update" and "Next" buttons.

Each order entry shows:

- Order status badge (e.g., Pending, In Progress, Ready, Completed)
- Customer name and order date/time
- Order ID
- Handover method badge (e.g., Pickup, Delivery)
- Payment status (Paid or Unpaid)
- Total amount
- Update and Next buttons

6.2. Updating Order Status

To update an order's status from the Orders page, click the "Next" button on the order card to advance it to the next status stage. You can also click directly on the order to open a detail modal and manually select a specific status from the Update Status section.

The order status flow is:

- Pending → Processing (In Progress)
- Processing → Ready
- Ready → Completed
- Completed → Picked Up / Delivered

6.3. Completing an Order

When an order's laundry is done and ready for pickup, mark it as "Completed" by selecting the Completed status from the order detail modal. If the Completion Safeguard is enabled in Settings, a confirmation dialog will appear:

- "Mark as Completed? Order [Order ID] for [Customer Name]"
- A checkbox option to "Notify Customer via SMS" is shown. When checked, the system will open your messaging app to send a pre-written ready-for-pickup/delivery text.
- Click "Confirm Completion" to finalize, or "Cancel" to go back.

6.4. Printing a Receipt

To print a receipt for an order, click the “Print Receipt” button on the order card (if the Order Card Print Button is enabled in Settings). The receipt will be sent to the default printer configured in Settings.

6.5. Cancelling an Order

To cancel an order, open the order detail modal and look for the Cancel option. Confirm the cancellation when prompted. Cancelled orders can be cleared from the database in the Settings > Database Maintenance section.

6.6. The 10-Minute Rule

When an order is marked as “Completed”, it will not immediately disappear from the Orders list. The order remains visible for 10 minutes to allow staff to make any final updates or print the receipt again if needed. After 10 minutes with no changes, the order will automatically be removed from the active Orders view.

7. Customers

7.1. Viewing the Customer List

The Customers page shows a list titled “Customers Manage your customer database”. At the top, three summary counters are displayed:

- Total Customers: The total number of customers in the database.
- New This Month: The number of new customers added in the current month.
- New Today: The number of new customers added today.

Each customer entry in the list shows:

- Customer name initial (avatar)

- Customer full name
- Number of orders (e.g., “6 Orders”)
- Phone number
- Address (if available)

7.2. Editing a Customer

To edit a customer’s information:

1. Hover over the customer entry. A three-dot menu icon will appear on the right side.
2. Click the three-dot menu.
3. Select “Edit Details” from the dropdown.
4. An “Edit Customer” modal window will appear with the current details pre-filled: Full Name, Phone Number, and Address (Optional).
5. Make the necessary changes and click “Save Changes”. A success notification will appear confirming the update.

7.3. Removing a Customer

To remove a customer from the database:

1. Hover over the customer entry and click the three-dot menu.
2. Select “Remove Customer” from the dropdown.
3. Confirm the removal when prompted.

Warning: Removing a customer is permanent. Their order history will be preserved in the system but the customer profile will be removed from the active customer list.

7.4. Searching for a Customer

Use the Search bar at the top of the Customers page to quickly find a customer. You can search by:

- Name (e.g., typing “Aldrin” will show only the customer named Aldrin)
- Phone number (e.g., typing a number will filter customers by that number)
- Address (e.g., typing “blk 1” will show customers with that address)

The list will filter in real-time as you type.

8. Services

The Services page is where all laundry service offerings are managed. Access it by clicking “Services” in the left navigation menu.

Note: The Services page is accessible only to Admin users. Workers/Staff cannot access or edit services.

8.1. Viewing Services

The Services page displays all services currently configured in the system. Each service entry shows:

- Service name (e.g., Dry 9-10kg, FS 8kg w/ Deterg., Wash 8kg)
- Service type category (e.g., DRY ONLY, WASH & DRY, WASH ONLY)
- Price
- Cost of goods / supply cost (shown as COST: ₱X.XX and MARGIN: XX%)
- Status (Active shown in green / Inactive shown in red)
- An Edit button
- An enable/disable toggle switch

	Dry 8kg	DRY ONLY	PRICE: ₱50.25	COST: ₱0.00 (100% MARGIN)	ACTIVE		
	Dry 9-10kg	DRY ONLY	PRICE: ₱100.00	COST: ₱50.00 (50% MARGIN)	ACTIVE		
	FS 8kg w/ Deterg.	WASH & DRY	PRICE: ₱51.00	COST: ₱50.00 (2% MARGIN)	ACTIVE		

8.2. Editing a Service

To edit an existing service:

1. Click the “Edit” button (pencil icon) next to the service you want to modify.
2. The service row will expand into an inline edit form showing: Service Name field, Service Category dropdown (Dry Only, Wash Only, Wash & Dry), Selling Price field, and Est. Supply Cost field.
3. Make your changes and click “Save” to save, or “Cancel” to discard changes.

Service Name *	Service Category *	Save Changes Cancel
Dry 8kg	Dry Only	
Selling Price (₱) *	Est. Supply Cost (₱)	
50.25	0.00	

Note: If the supply cost entered is equal to or higher than the selling price, the system will alert you to prevent saving an unprofitable service.

8.3. Adding a New Service

To add a new service:

1. Click the “Add New Service” button at the top of the Services page.

2. A new form will appear at the top of the services list with fields for: Service Name, Service Category, Selling Price (₱), and Est. Supply Cost (₱).
3. Fill in the required fields and click “Create Service” to add the service. It will immediately appear in the list and be available when creating orders. Click “Cancel” to discard.

I Add New Service

Service Name *	Service Category *	Create Service
e.g. Premium Wash	Wash Only	
Selling Price (P) *	Est. Supply Cost (P)	Cancel
0	0	

8.4. Enabling and Disabling a Service

Each service has a toggle switch on the right side:

- Toggle ON (green): The service is active and will appear in the New Laundry services list.
- Toggle OFF (red): The service is inactive and will not appear when creating new orders.

Simply click the toggle to change the service's active status. You do not need to delete a service to hide it from orders simply disable it.

8.5. Customer Loyalty (Voucher/Reward Program)

At the top of the Services page is the Customer Loyalty section. This is where the shop's reward program is configured.

 Customer Loyalty PROMO ACTIVE	☒	REWARD SUMMARY FREE FS 8KG W/O DETERG. After 3 visits
Free Service Reward FS 8kg w/o Deterg.		Save Ticket
Orders Needed 3		

The loyalty program works on a stamp/points system. When a customer places a qualifying order, they earn a point (stamp). Once they accumulate the required number of points, they can claim a free service reward.

Configuration options:

- Free Service Reward dropdown: Select which service the customer will receive for free upon reaching the required number of orders (e.g., FS 8kg w/o Deterg.).
- Orders Needed field: Enter the number of completed orders a customer must have before they can claim the free reward (e.g., 1 order).
- Save Ticket button: Click this button to save any changes made to the loyalty program configuration.

The Reward Summary on the right side shows a preview of the current reward configuration (e.g., “FREE FS 8KG W/O DETERG. After 1 visit”).

The Customer Loyalty section also has a master toggle at the top right to enable or disable the entire program.

8.6. Disabling the Voucher Program

When you toggle OFF the Customer Loyalty program, a “Disable Voucher?” dialog box will appear with two options:

- **Pause Progress:** Disables the voucher program but keeps all customer points saved. You can re-enable the program later and customers will continue from where they left off.
- **Reset Everything:** Disables the voucher program AND clears all customer loyalty points. This action is irreversible.
- **Nevermind, keep it active (text link):** Cancels the action and keeps the program enabled.

9. Reports

The Reports page provides a comprehensive analytics dashboard for the shop. Access it by clicking “Reports” in the left navigation menu.

9.1. Overview Metrics

At the top of the Reports page, four summary metric cards are displayed for the selected time period:

- **Total Profit:** The total net profit for the selected period (revenue minus cost of goods sold). Displayed as “Net earnings”.
- **Orders Volume:** The total number of orders handled.
- **Avg Order Value:** The average amount per order (per customer).
- **Avg Turnaround:** The average processing speed from order creation to ready.

The time period selector at the top left allows you to filter data by: Today, Last 7 Days, Last 30 Days, This Year, Last Year, or a specific year.

9.2. Sales Analysis

The Sales Analysis section shows a bar chart of sales over time. A sub-filter lets you switch the chart between different time views (e.g., Today, This Month, This Year). At the bottom of the chart, the Total Today Sales amount is displayed.

9.3. Projected Profit Ledger

The Projected Profit Ledger shows a bar chart of projected order profit over the current month. Each bar represents projected order profit for that day. The Total Net Profit displayed has been automatically reduced by the current month's logged overhead expenses (configured in Settings).

9.4. Traffic Pulse

The Traffic Pulse section shows a line graph of customer order traffic throughout the day or selected period. Below the chart, it highlights the typical peak window time range (e.g., “1 pm — 3 pm”). A sub-filter allows you to view traffic by specific days.

9.5. Customer Retention

The Customer Retention section shows the percentage of returning customers versus new customers within the selected period. It displays:

- Retention percentage
- Total unique customers
- New customer count
- Return customer count

9.6. Popular Services

The Popular Services section shows a pie chart of which services were most used during the selected period. It lists the top services with their percentage of total orders. You can filter by Last 7 Days or other time periods using the sub-dropdown.

9.7. Top Customers

The Top Customers section shows a horizontal bar chart listing the customers with the highest number of orders during the selected period. This helps identify the most loyal customers. You can filter by Last 30 Days or other periods.

9.8. System Logs

The System Logs section in the Reports page displays a chronological log of all recent system activity and order status changes. Each log entry shows:

- The type of action (e.g., Status Updated To Completed, Status Updated To Picked Up, Status Updated To In Progress)
- The associated customer name and order ID
- How long ago the action occurred

9.9. Monthly Expenses History

MONTHLY EXPENSES HISTORY ⓘ		
4 Months Recorded		
April 2026 2 recorded items	₱7,000.00	▼
March 2026 1 recorded items	₱100.00	▼
February 2026 1 recorded items	₱3,241.00	▼
January 2026 1 recorded items	₱1,230.00	▼

The Monthly Expenses History section shows a chronological list of all logged overhead expenses organized by month. Each month entry shows the total amount spent and the number of items recorded. Click on a month to expand it and see the individual expense entries.

9.10. Reward Recipients

 Reward Recipients Loyalty Claims History		1
Aldrin #ORD-BMD515	Wash 8kg (Reward)	-3 pts

The Reward Recipients section shows customers who have recently claimed loyalty rewards. Each entry shows:

- Customer name
- Order ID linked to the reward
- Reward item claimed (e.g., FS 8kg w/o Deterg. [Reward])
- Points deducted

Clicking on a reward recipient entry will open a modal showing the full reward claim details: phone number, address, order number, date claimed, reward item, and points deducted.

9.11. Archived Customers

Below the Reward Recipients, an Archived Customers section shows any customers who have been deleted from the active customer list. It shows:

- Customer name
- Phone number (partially masked)
- Date they were archived
- Number of orders they had

9.12. Exporting Orders (Analytics Export)

To export the full analytics and order data:

1. Click the “Export Orders” button at the top right of the Reports page.

2. A Security Verification PIN dialog will appear. Enter the correct 6-digit PIN and click “Authorize Export”.

- Once authorized, the system will generate and download an Excel (.xlsx) file to your computer.
- The downloaded file is named in the format: Lola_Fe_Laundry_Analytics_YYYY-MM-DD.xlsx.
- The file contains two sheets: Executive Summary (showing key metrics) and Raw Database Dump (containing the complete raw order data).

	A	B	C
1	Metric Category	Metric Name	Value
2	FINANCIAL PERFORMANCE	Gross Processed Revenue	6853.5
3	FINANCIAL PERFORMANCE	Total Cash Received	6853.5
4	FINANCIAL PERFORMANCE	Total Digital/Transfer	0
5			
6	OPERATIONAL METRICS	Total Orders Handled	45
7	OPERATIONAL METRICS	Delivery Orders	7
8	OPERATIONAL METRICS	Walk-in / Pickup Orders	38
9			
10	ORDER STATUS FUNNEL	Pending / Received	7

This is the Revenue Leakage Tracker, located on the Reports page. Its purpose is to provide a transparent ledger of all transactions that were voided or aborted before completion, allowing management to analyze the financial impact of lost sales. The header displays the Total Sales Lost, which represents the sum of all cancelled orders for the current filtered period. Each entry in the list shows the customer's name, their specific order number, the handover method, and the exact date and time the cancellation occurred.

10. Settings (Admin Only)

The Settings section is accessible only to Admin users. Workers/Staff do not have access to this section. It contains all system configuration options for the laundry shop.

10.1. Accessing Settings

Click “Settings” in the left navigation menu. The first time you access Settings in a session, you will be prompted with a Security Verification PIN pad. Enter your 6-digit PIN to unlock the Settings page.

10.2. Overhead Monthly Expenses

Overhead Monthly Expenses				
Total Amount: ₱11,571.00				
Filter by Month Filter by Category All Categories				
Month	Category	Notes	Amount	Actions
April 2026	⚡ Electricity	No description	₱1,000.00	
April 2026	⚡ Electricity	No description	₱6,000.00	
March 2026	⚡ Electricity	No description	₱100.00	

This section is the Profit Health Ledger for managing all non-order-related business overhead expenses such as electricity, water bills, space rent, staff payroll, and bulk supplies. These logged expenses are automatically deducted from gross revenue when calculating the shop’s net profit in the Reports section.

The section shows:

- Total Amount: The combined overhead for your current filtered selection.
- Filter by Month: Use the month calendar to filter expenses by a specific month.

- Filter by Category: Filter by expense type (All Categories, Electricity, Water Bill, Space Rent, Staff Payroll, Bulk Supplies).
- A table listing each expense entry with Month, Category, Notes, Amount, and action buttons (Edit/Delete).

To log a new expense:

The screenshot shows a modal titled "Log Monthly Expense" with a close button (X) in the top right corner. The form contains the following fields:

- Amount (₱):** A text input field with the value "0.00".
- Category:** A dropdown menu with a lightning bolt icon and the selected value "Electricity".
- Applicable Month:** A text input field with the value "April 2026".
- Notes / Description:** A text input field with placeholder text "E.g., Meralco bill, late payment...".

At the bottom of the modal, there are two buttons: "Cancel" and "Log Expense".

1. Click the "+ Log New Expense" button at the top right.
2. A "Log Monthly Expense" modal will appear.
3. Enter the Amount (₱), select a Category, choose the Applicable Month, and add optional Notes/Description.
4. Click "Log Expense" to save. The system will block duplicate entries for the exact same expense in the same month.

10.3. System Access Restriction

This feature allows you to lock the system outside of your shop's operating hours.

Steps to configure:

1. Toggle the System Access Restriction switch ON (it will turn green).

2. Select the Active Operating Dates by clicking on days in the calendar. Selected days will be highlighted in a circle.

Active Operating Dates

April 2026

< >

Su	Mo	Tu	We	Th	Fr	Sa
			1	2	3	4
5	6	7	8	9	10	11
12	13	14	15	16	17	18
19	20	21	22	23	24	25
26	27	28	29	30		

3. Set the Shift Starts At time (e.g., 07:00 AM).
4. Set the Shift Ends At time (e.g., 08:18 PM).

Shift Starts At:

07:00 AM

Shift Ends At:

08:18 PM

• Status Summary

System will lock except during the 33 selected dates between 07:00 AM and 08:18 PM.

5. The Status Summary will show a preview: “System will lock except during the [X] selected dates between [time] and [time]”.

6. Click “Save Configuration” to apply the settings.

Save Configuration

When the toggle is OFF, the system is accessible 24/7 and the calendar and time fields are disabled.

10.4. Receipt Configurations

The image shows a web form titled "Receipt Configurations" with a light blue border. It contains several input fields: "Store Name" with the value "LOLA FE'S LAUNDRY", "Address" with "Katwiran St. Ibayo Tipas taguig city", "Contact" with "09153248617", "Email" with "lolafeslaundry2025@gmail.com", and "Website / Social Media" with "https://google.com". Below these are two toggle switches, both turned on, labeled "Display Transaction Date" (with a green checkmark icon) and "Display Print Timestamp" (with a green clock icon). At the bottom is a "Footer Message" field containing "Clean clothes, Happy life!". A "Save Configuration" button is located at the bottom right of the form.

Receipt Configurations

Store Name
LOLA FE'S LAUNDRY

Address
Katwiran St. Ibayo Tipas taguig city

Contact
09153248617

Email

Website / Social Media
https://google.com

✓ Display Transaction Date ☒

🕒 Display Print Timestamp ☒

Footer Message
Clean clothes, Happy life!

Save Configuration

This section configures the information printed on customer receipts. The fields reflect the shop information used on all receipts:

- Store Name
- Address
- Contact number
- Email address
- Website / Social Media URL

Additional receipt toggles:

- Display Transaction Date: When enabled, the receipt will show the transaction date.
- Display Print Timestamp: When enabled, the receipt will show the exact time the receipt was printed.
- Footer Message: A custom message printed at the bottom of every receipt (e.g., “Clean clothes, Happy life!”).

Click “Save Configuration” after making changes.

10.5. Hardware and Default Printer

This section configures the default printer used for receipts. Three printer options are available:

- **Wired (USB):** For USB-connected thermal printers. Click to set as default. A “Test USB” button will appear.
- **Bluetooth:** For Bluetooth-connected thermal printers. Click to set as default. A “Test Bluetooth” button will appear.
- **PDF / Native:** For printing via the browser’s built-in PDF or print dialog. A “Test PDF” button will appear.

To test the printer, click the corresponding Test button. A test receipt will be sent to the selected printer.

10.6. Payment Methods

ACTIVE METHODS (3)

This section manages which payment methods are available when creating orders.

Currently active methods are listed (e.g., GCash, Cash, Maya) with individual toggle switches to enable or disable each one.

To add a new payment method:

Payment Methods

Method Name
e.g. GCash

Add

1. Type the new method name in the “Method Name” input field (e.g., GCash).
2. Click the “Add” button.
3. The new method will appear in the Active Methods list.

To disable a payment method, click its toggle switch to OFF. To re-enable it, click the toggle again.

Maya

10.7. Completion Safeguard

The Completion Safeguard adds a confirmation dialog and SMS notification option when marking an order as Completed.

Completion Safeguard

When enabled, the system will ask for confirmation and offer an SMS notification option before finishing an order.

● Protection Active

- Toggle ON (green): When an order is marked as completed, a confirmation dialog will appear asking you to confirm, with an option to send an SMS notification to the customer.

Completion Safeguard

When enabled, the system will ask for confirmation and offer an SMS notification option before finishing an order.

● Fast-Track Mode

- Toggle OFF: Orders can be marked as completed without any confirmation dialog.

10.8. Auto-Print Receipts

Auto-Print Receipts

When enabled, a receipt will fire to your default printer the moment a new order is saved.

● Auto-print Active

When Auto-Print Receipts is enabled (toggle ON), a receipt will automatically be sent to the default printer each time a new order is placed. You do not need to manually click Print.

Toggle OFF to disable automatic printing (receipts can still be printed manually from the Orders page).

10.9. Order Card Print Button

This setting controls the visibility of the “Print Receipt” button on all order cards in the Orders page.

- Toggle ON: The Print button is visible on every order card.

- Toggle OFF: The Print button is hidden from order cards (useful if you only use Auto-Print).

10.10. Public Order Tracking

When enabled, this feature allows customers to track their laundry order status online by scanning a QR code printed on their receipt.

- Toggle ON: A unique tracking QR code is generated and printed on every thermal receipt.

- Toggle OFF: No QR code is printed on receipts.

10.11. Session Security

The Session Security feature automatically terminates the user's session if the browser tab is closed for more than 30 minutes. This prevents unauthorized access on shared devices.

- Toggle ON: Auto-logout protection is active. The session will expire after 30 minutes of inactivity.

- Toggle OFF: Sessions remain active regardless of inactivity. Not recommended for shared devices.

10.12. Database Maintenance

The Database Maintenance section contains three permanent and irreversible data management actions. These actions cannot be undone, so always export and back up your data before using them.

- Canceled Orders (Clear button): Permanently deletes all orders marked as Canceled from the database.

- Reward History (Clear button): Permanently erases the history of all claimed rewards. This action is irreversible.

- Activity Logs (Clear button): Permanently clears the master log of all system activity.

A red warning note at the bottom of this section reads: “Note: These actions are permanent and cannot be undone. Please ensure you have exported and backed up any necessary data before clearing your ledger.”

10.13. Locking Settings

To re-lock the Settings section after you are done:

1. Click the “Lock Settings” button at the top right of the Settings page.

2. A Security Verification PIN pad will appear.

3. Enter your PIN to confirm the lock.
4. The Settings page will be locked and will require a PIN to access again.

11. Logging Out

To log out of the system:

1. Click “Log out” at the bottom of the left navigation menu.

2. A confirmation dialog will appear: “Confirm Logout — Are you sure you want to log out? Any unsaved changes might be lost.”

3. Click the “Log Out” button to confirm and log out. Click “Cancel” to stay logged in.
4. After logging out, you will be redirected back to the Store Login Portal PIN verification screen.

It is recommended to always log out after your shift, especially on shared devices, to protect the security of the system
